Projects

- **Angolo Experts - Content Selling Platform Development**

Actively involved in developing a comprehensive software solution for Angolo Experts, designed to facilitate the selling of various digital content. Implemented features such as user authentication, content management, and secure payment processing, enhancing user experience and platform security.

- **Home Services Application**

Led the development of the Home Services application, a platform that connects users with local service providers for various home-related services. Focused on developing a user-friendly interface and integrated real-time booking and service management functionalities.

- **Mcomps Limited Website Development**

Played a key role in developing and enhancing the Mcomps Limited website. Contributed to the design and implementation of the website's structure, ensuring a responsive and interactive user interface. Collaborated with team members to optimize website performance and SEO.

- **Baraton University Cafeteria Supply Management System**

Developed a comprehensive supply management system for the Baraton University Cafeteria. This system streamlined inventory tracking, ordering processes, and supplier communications, leading to more efficient cafeteria operations and reduced waste.

- **PointPro Website Development**

Created the PointPro website, focusing on delivering a Mobile Point Of Sale to business people.
